Education

Pune University

Bachelor of Technology in Computer Science Engineering

July 2020– May 2023

pune, Maharashtra

Relevant Coursework

- Data Structures
- Cloud Computing
- Back end development
- Database Management
- software testing
- object-oriented concept
- Operating system
- Data Science

Experience

Worldline (fin-tech company)

Sep 2023 – Feb 2024

Software Engineer

pune, Maharashtra

- Developed a service to automatically perform a set of unit tests daily on a product in development in order to decrease time needed for team members to identify and fix bugs/issues.
- Collaborated with cross-functional teams to gather requirements, conduct system analysis, and design system architectures for new projects, resulting in more efficient development processes and reduced time-to-market.
- Mostly work in fraud detection management project.

Letsgrowmore (Startup, Inc)

April 2023 – May 2023

Data science Intern

pune, Maharashtra

- working with real-world projects. hands-on experience and equipped me with essential skills in data analysis, machine learning, and data visualization.

Projects

E-Voting system using blockchain | Blockchain, Solidity, Meta mask, Azure, Opencv, Html, Css, sql, javascript, git January 2024

- Developed and managed an E-voting system utilizing blockchain technology.
- Implemented innovative algorithms to address and mitigate fake voting issues.
- Implemented innovative algorithms to address and mitigate fake voting issues.
- Enhanced transparency and trustworthiness in the voting system. Led a team in designing, developing, and deploying the E-voting solution.

Responsive Weather Forecasting | Html, Css, JS, API

November 2023

- The app utilizes the user's current location to fetch accurate and up-to-date weather information. It provides details such as temperature, humidity, wind speed, and conditions like sunny, cloudy, or rainy.
- Users can access a multi-day forecast, enabling them to plan their activities based on expected weather conditions. The forecast includes temperature ranges and weather conditions for each day.
- Weather App offers an intuitive and visually appealing interface, making it easy for users to access weather information effortlessly. The design focuses on displaying the data in a clear and concise manner. The app is built using responsive design principles, ensuring a seamless experience across various devices, including desktops, tablets, and mobile phones.

Language Translator | Html, Css, JS, API

October 2024

- Translate Data spanning over 100 languages. Text-to-Speech functionality allows users to hear the translated text in the desired language.
- Allow to easily clear the text box, removing any previous translations or input.
- 5. A user-friendly Graphical User Interface (GUI) for seamless and intuitive usage.
- Allow to quickly and easily save the translated text to the clipboard..

Technical Skills

Languages: java, Python, Cpp, C, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio

Technologies/Frameworks: Linux, Jenkins, GitHub, JUnit, WordPress, cloud computing, Azure, kubernetes, API, Nodejs, Angularjs

Extracurricular

- Authored the book "Python Primer" and available on Amazon, showcasing my python knowledge and creative writing.
